

## Positions

---

**08.2024 – 09.2024**     **Research visit (Wuchen Li at the University of South Carolina)** (Accelerated Stein metric gradient flows with general bilinear kernels on Gaussian families.)

In the Applied Mathematics group at Technical University Berlin.

**08.2023 – 01.2029**     **PhD candidate** (with teaching responsibilities from 2024 on, funded by the German Federal Ministry of Education and Research under the project “VI-Screen” until then.)

**04.2023 – 07.2023**     **PhD Stipend** (Researching Wasserstein gradient flows with respect to the Rényi divergence and entropy.)

**06.2021 – 03.2023**     **Student research assistant** (Research on Wasserstein gradient flows, writing a script for the lecture “Approximation theory” and rewriting the script for the lecture “Convex Analysis” in the setting of infinite-dimensional spaces, proofreading manuscripts.)

At the Department of Mathematics, Technical University Berlin.

**10.2019 – 03.2021**     **Tutor** (Giving tutorials and correcting homework for the lectures “Functional Analysis I”, “Differential Equations I” and “Linear Algebra for Engineers”.)

## Preprints

---

**14.08.2024**             **Wasserstein Gradient Flows of MMD Functionals with Distance Kernel and Cauchy Problems on Quantile Functions** (Joint work with Richard Duong, Robert Beinert (TU Berlin), Johannes Hertrich (UCL) and Gabriele Steidl (TU Berlin).)

**30.04.2024**             **Interpolating between Optimal Transport and KL regularized Optimal Transport using Rényi Divergences** (Joint work with Jonas Bresch (TU Berlin).)

**07.02.2024**             **Wasserstein Gradient Flows for Moreau Envelopes of  $f$ -Divergences in Reproducing Kernel Hilbert Spaces** (Joint work with Sebastian Neumayer, (TU Chemnitz), Gabriele Steidl and Nicolaj Rux (TU Berlin).)

## Talks

---

**19.08.2024**             **Wasserstein Gradient Flows for Moreau Envelopes of  $f$ -Divergences in Reproducing Kernel Hilbert Spaces** (UCLA level set seminar (Stan Osher))

## Posters and presentations at conferences

---

**17.–21.06.2024**         **Learning and Optimization in Luminy (LOL)** (Wasserstein Gradient Flows for Moreau Envelopes of  $f$ -Divergences in Reproducing Kernel Hilbert Spaces, Poster)

**11.–15.03.2024**         **Workshop on Optimal transport from theory to applications - Interfacing dynamical systems, optimization and machine learning** (Wasserstein Gradient Flows for Moreau Envelopes of  $f$ -Divergences in Reproducing Kernel Hilbert Spaces, Poster)

## Teaching

---

**Winter 2024/25**      **Analysis II for Mathematicians** (Tutor)

Compulsory module in the Mathematics program, covering multidimensional derivatives, inverse function theorem, ...

**Winter 2024/25**      **Harmonic Analysis** (Lecture assistant)

Elective advanced module in the Mathematics program.

**Summer 2024**      **Convex Analysis** (Lecture assistant)

Elective advanced module in the Mathematics program.

**01.2024 - 02.2024**      **Numerical Mathematics I** (Lecture assistant)

Third-semester's compulsory module (in German) in the Mathematics Bachelors program.

## Education

---

**04.2021 – 05.2023**      **Mathematics Master** (Technische Universität Berlin. Final grade: 1.1)

Focus on further Functional Analysis topics as well as Topology, Differential Geometry, Complex Analysis and Statistics. Master's thesis: Wasserstein gradient flows - with an eye towards positive matrix-valued measures. Supervised by Prof. Gabriele Steidl and Dr. Robert Beinert.

**10.2017 – 04.2021**      **Mathematics Bachelor** (Technische Universität Berlin. Final grade: 2.0)

Focus on Functional Analysis and Differential Equations with a minor in Machine Learning. Bachelor's thesis: Atomic Norm Minimisation for Superresolution. Supervised by Prof. Gabriele Steidl and Dr. Robert Beinert.

## Community service

---

I have reviewed for the Journal Of Optimization Theory and Applications (JOTA), Transactions on Machine Learning Research (TMLR) as well as a for the Bayesian Decision-making and Uncertainty Workshop at NeurIPS 2024.

## Awards

---

At the 17. annual Dies Mathematicus in 2022 at the TU Berlin I received a prize for the best Bachelor's thesis talk.

## IT Skills

---

I have a good knowledge of Python, including torch and using a HPC cluster. Furthermore, am comfortable with MATLAB and well versed in L<sup>A</sup>T<sub>E</sub>X.

## Volunteer work

---

I the school year 2022/23 I have been tutoring around fourteen seventh-graders in weekly sessions discussing mathematical puzzles and questions from the German Mathematical Olympiad.

I have also served as corrector at the team competition at the Tag der Mathematik 2022 (Mathematics Day) organized by the three Berlin universities, where sixty-nine teams of high schoolers participated.

## Language skills

---

My native language is German. I have received English lessons since preschool and in Primary and Middle School, where many subjects were taught in English by native speakers. Furthermore I have been instructed in Spanish by native speakers from grade four to grade ten and started teaching myself French in December 2023.
